

Processing of District Six-Year Extended Longitudinal Graduation and Dropout Rates, Class of 2021

Introduction

This document describes the steps taken by the Texas Education Agency (TEA) to build the 2021 cohort and to calculate the class of 2021 six-year extended longitudinal graduation, continuation, Texas Certificate of High School Equivalency (TxCHSE) recipient, and dropout rates used in agency publications and for accountability, in accordance with the [Elementary and Secondary Education Act as reauthorized by the Every Student Succeeds Act \(ESSA\)](#) and the [ESSA High School Graduation Rate Non-Regulatory Guidance](#). The processing decisions in the document are final. Find more information on longitudinal rates at <https://tea.texas.gov/reports-and-data/school-performance/accountability-research/completion-graduation-and-dropout>.

Definitions and Uses

The six-year extended class of 2021 consists of students who began Grade 9 in Texas public schools for the first time in 2017-18, or who transferred into the cohort, and either graduated by August 31, 2023, continued high school in the fall of 2023, received a TxCHSE by August 31, 2023, or dropped out of high school as of the fall of 2023. Students qualified to graduate by means of an individual graduation committee (IGC) determination were included as graduates.

TEA calculates two six-year extended longitudinal rates, including longitudinal graduation rates and longitudinal graduation, continuation, or TxCHSE recipient rates which are used for accountability. Whereas the four-year longitudinal rates for the class of 2021 were based on tracking students into the fall of 2021, the six-

as outlined in the *State Accountability Exclusions* section, were excluded from campus and district rate calculations used for the Student Achievement domain.

Beginning with the 2023 accountability cycle, a change was introduced to rates used in the Student Achievement domain where alternative education accountability (AEA) procedures apply. Students who previously dropped out are now included in state accountability rate calculations for AEA campuses if the students graduate, continue, or receive a TxCHSE. Graduates, continuers, and TxCHSE recipients who previously dropped out (and are not eligible for any other exclusion) are included in the numerator, but not the denominator, of the six-year longitudinal graduation, continuation, or TxCHSE recipient rate calculation if AEA procedures apply. Find more information on the Student Achievement domain at <https://tea.texas.gov/texas-schools/accountability/academic-accountability/performance-reporting/2024-accountability-rating-system>.

In addition, a six-year extended graduation rate was calculated for federal reporting purposes. One group of students, outlined on page 11, was excluded from campus and district rate calculations used for this purpose.

Processing

Overview. Processing six-year extended graduation and dropout rates for the class of 2021 involved three steps: (1) gathering data, including: (a) attendance, demographic, and leaver records for the 2017-18 through 2022-23 school years; (b) enrollment records from the fall of 2021, 2022, and 2023; and (c) TxCHSE records from January 1, 2018 through August 31, 2023; (2) determining the district responsible (continuer, TxCHSE recipient, dropout); and (3) calculating six-year extended rates at the campus and district levels.

Determining cohort membership and gathering student records. The 2021 cohort was established when four-year longitudinal rates were calculated for the class of 2021. No students were added to or subtracted from the statewide cohort to calculate the six-year extended longitudinal rates. However, a student may have been added to the six-year extended cohort if the student changed districts during the 2021-22 or 2022-23 school years or in the fall of 2023.

Seven years of data were used to calculate the class of 2021 six-year extended longitudinal rates. Records from the first five years were identical to those gathered in the five-year extended rates, but records from the sixth and seventh years were different (Table 1).

became final status in the cohort
information).

Assigning final student statuses

Year 3: 2019-20

PEIMS attendance records from the 2019-20

School year	In Texas public school this year?	Leaver this year?

the cohort and was reported as gifted and talented in the first three years of the cohort but not in the fourth year was not included in the gifted and talented graduation rate. Exceptions were made for students who were identified as emergent bilingual students/English learners (EB students/ELs), as homeless, or as in foster care at any time while attending Grades 9-12 in Texas public schools. Additionally, career and technical education (CTE) information is not available for continuing students in longitudinal rate

Note, starting with the 2021-22 school year, the agency began using a revised method for determining CTE participation. A

from PEIMS Submission 3 to derive each CTE classification was implemented. The automated process replaced the manual process that used to be the responsibility of the individual LEAs. See
